

# Questions for your visit

- What is the test for?
- What do we need to do to get ready for the test?
- How do you perform the test? How will it feel?
- When will I get the results?
- Why do they need this treatment?
- Will this medicine interact with medicines that they are already taking?
- What side effects can we expect?
- What do I do at home?
- When do we follow up?
- What symptoms should we watch for?
- What infectious diseases are going around and how can we best protect against them?
- When should we seek medical attention?
